

PALLET TRUCK WITH WEIGHT INDICATION

The HP ESE20/5 is built on the head of a completely standard hand pallet truck, which makes it different from all conventional pallet truck scales: the single fork structure contains no scale components and the forks keep their original dimensions.

- Capacity: 2000 kg in 5 kg steps
- Scale functions: zero correction, total weight
- Electronic lifting height indication in display
- Power supply: 2 standard 1.5V AA / LR6 batteries
- Possible to reach 3,000 weightings on a set of batteries
- Original fork dimensions
- Splash proof: IP65

Only 2 keys needed for operation
New: Totalization function!

Indicator powered by two AA batteries (2x1.2-1.5V), which are located behind a sealed cover

Schematic exploded view of product configuration

The “First weight indication system with electronic height indication” the ESE20/5 is used and assembled on a standard, normal and traditional hand pallet truck... one single chassis is needed only .. and that makes the big difference with all other traditional hand pallet trucks with scales, which need systematically a double chassis.
